MI's Year in Review

Explore a calendar of IMI’s key achievements and milestones from 2021. Through its focus on advancing the research around the prevention of brain diseases, IMI has made significant strides in 2021, shedding light on the complex pathogenesis of Alzheimer’s and other brain disorders. His year has seen the launch of an exciting new initiative that aims to accelerate progress towards sustainable solutions for these conditions.

New Research Highlights
- Preventing the African Brain Health Initiative (AHI)
- Statistical and genetic analysis of risk factors associated with Alzheimer’s disease
- The role of gender in the development of Alzheimer’s disease

New Project Kickstarts
- Towards a sustainable solution for Alzheimer’s disease
- Collaboration with New Brain Initiative (NB) on Neuroimaging

MI’s Mission in 2021
- To advance knowledge and solutions for brain diseases
- To foster collaboration and innovation in the field
- To engage with stakeholders and the public
