Welcome

Through our newly implemented newsletter, we aim to give you the latest insights into the emerging trends in the healthcare industry. Whether it's news about advancements in medical research or updates on policy developments within the healthcare sector, we aim to keep you informed.

The Institute for Medical Innovation (IMI) is a 501(c)(3) non-profit research organization, dedicated to providing information, data, and actionable solutions that address medical innovation and healthcare delivery challenges. Our mission is to improve health outcomes and reduce the burden of disease on society through the acceleration of medical innovation.

In this issue, we discuss the latest developments in medical research and innovation, as well as the impact of these advancements on patient care. We also explore the role of technology in shaping the future of healthcare. In the agenda section, we identify what works well in IMI and explore areas that need improvement, while detailing our testing and learning strategy.

IMI Resources

With so many reports and projects taking off at IMI, we want to make sure we’re on track and making the most of our resources. This week, we will be featuring a new series of internal IMI resources, including a guide to mental health care and a series on mental health and anxiety.

Chief Financial Officer, CHIEF FINANCIAL OFFICER, MEDICAL MENTOR: "We are proud to announce the launch of our new series of internal IMI resources, which we believe will help to improve our members’ mental health and well-being. Our series will cover a range of topics, including mental health care, anxiety, and depression, and we hope that our members will find these resources useful.

Several Behavioral Health Conferences to Be Held in 2017

Recent studies have shown that adults are more likely to experience mental health issues, and that these issues can have a significant impact on their overall health and well-being. As a result, there has been a growing interest in the field of behavioral health.

In this issue, we will be exploring the latest developments in the field of behavioral health, with a focus on the challenges and opportunities faced by behavioral health professionals.

IMI Committees

What role do the IMI committees & subcommittees play in focusing on their meetings? We have evaluated a variety of the major projects we are actively backing. Are you interested in joining the discussion? Cheryl, Jennifer, Chelsea, and Tom are eager to hear your thoughts.

Behavioral Health Subcommittee

This new entity will be focused on meeting the needs of the population. This will be done by creating a series of workshops and webinars, which will be open to all members of the community.

Data & Research Development Team

The team has dedicated a significant amount of time to the development of new data models, and has worked with a number of experts in the field. The team has also developed a new tool for data visualization, which will allow for easier analysis of large datasets.

Annual Medical MBCO Survey Subcommittees

The IMI Behavioral Health Subcommittee will be focusing on developing questions that are relevant to the population, with an emphasis on high-risk conditions, such as depression, anxiety, and substance abuse. The team has also developed a new tool for data analysis, which will allow for more accurate interpretation of the data.

Social Determinants of Health Subcommittee

This new subcommittee will be focused on understanding how social determinants of health influence health outcomes. The team will be working with experts in public health, as well as with community leaders, to develop a comprehensive understanding of the factors that affect health outcomes.
